

WIBYCOIN (WIBY) – OFFICIAL WHITEPAPER

1. Introduction

The global sports betting market moves hundreds of billions of dollars annually, with horse racing being one of the most traditional and profitable segments. Despite its economic relevance, the industry still faces major challenges such as lack of transparency, delayed payouts, excessive intermediaries, and limited auditability.

WibyCoin (WIBY) is a blockchain-based utility token designed to modernize and decentralize the sports betting ecosystem, with a strong focus on **horse racing bets and decentralized betting platforms**.

2. Project Vision

WibyCoin aims to become a **reference digital asset** for decentralized sports betting by offering:

- Full on-chain transparency
 - Automated and instant prize settlements
 - Reduced operational and transaction costs
 - High security through smart contracts
 - Global and permissionless access
-

3. Market Problem

Traditional betting platforms operate in centralized environments that present several limitations:

- Opaque betting and payout mechanisms
- Risk of internal manipulation
- Slow or restricted withdrawals
- Dependence on trusted intermediaries
- Geographic and regulatory barriers

These issues reduce user trust and limit the long-term scalability of the industry.

4. The WibyCoin Solution

WibyCoin introduces a **decentralized betting ecosystem** where:

- All bets are recorded on the blockchain
- Smart contracts enforce betting rules automatically
- Decentralized oracles verify official race results
- Payouts are executed instantly and transparently

- All transactions are publicly auditable
-

5. Technological Architecture

WibyCoin is built on the **Solana blockchain**, selected for its **high throughput, ultra-low latency, and minimal transaction fees**.

The Solana-based architecture enables:

- High-performance smart contracts (Solana Programs)
- Thousands of transactions per second (TPS)
- Near-instant transaction finality
- Extremely low fees, ideal for frequent betting
- Native integration with Solana DEXs
- Compatibility with wallets such as Phantom, Solflare, and Backpack

This infrastructure is especially suitable for **real-time sports betting applications**.

6. Use Cases

6.1 Horse Racing Bets

- On-chain bet registration
- Oracle-based result validation
- Automated prize distribution

6.2 Decentralized Sports Betting

- Token-based betting pools
- Transparent odds and payouts
- Trustless settlement

6.3 Rewards and Incentives

- Loyalty programs
 - Liquidity provider incentives
 - Ecosystem participation rewards
-

7. Tokenomics

- **Token Name:** WibyCoin
- **Symbol:** WIBY

- **Standard:** SPL (Solana Program Library)
- **Type:** Utility Token

Token Utility

- Sports betting payments
- Platform fees
- Rewards and incentives
- Future governance mechanisms (DAO – under study)

The tokenomic model is designed to balance liquidity, sustainability, and long-term ecosystem growth.

8. Roadmap

Phase 1 – Development (2025–2026)

- Smart contract development on Solana
- SPL token creation
- Devnet and Testnet testing
- Initial security audits

Phase 2 – Initial Launch (Q4 2026)

- Deployment on Solana Mainnet
- Listing on Solana-based DEXs
- Public trading launch
- Liquidity pool formation

Phase 3 – Expansion (Q1–Q2 2027)

- Strategic partnerships
 - Ecosystem expansion
 - Listings on major centralized exchanges (CEXs)
 - **Initial token price: 0.002 USDT**
-

9. Security and Audits

Security is a core pillar of the WibyCoin project:

- Best practices in smart contract development
- Independent third-party audits
- Continuous monitoring

- Anti-fraud and exploit prevention mechanisms
-

10. Compliance and Risk Considerations

WibyCoin acknowledges that sports betting involves regulatory and operational risks. The project is developed with a focus on:

- Transparency
 - Technical responsibility
 - Adaptability to different jurisdictions
-

11. Future Outlook

Future development plans include:

- Expansion to additional sports markets
 - DAO-based decentralized governance
 - Global betting platform integrations
 - Sustainable long-term ecosystem growth
-

12. Conclusion

WibyCoin (WIBY) represents a next-generation betting infrastructure powered by the **Solana blockchain**, combining transparency, automation, and decentralization. With a clear roadmap and a strong focus on a high-volume betting niche, WibyCoin is positioned as an innovative solution for the future of decentralized sports betting.
